

Industry Expert Evaluation Form

CSE 438: Robotics Lab

Capstone Project: Survey 2 (Post-Implementation Validation)

Project Title: Smart Firefighter Car with Automatic Fire Detection and Extinguishing System.

Name of Expert: MD. TALHA BIN ZASIM

Organization / Industry Sector: FIRE SERVICE AND CIVIL DEFENCE

Contact No.: 01734-144949

Email: talhaju@gmail.com

Please evaluate the completed project based on the following criteria:

Criteria	Very High	High	Moderate	Low	Very Low
Successful implementation of proposed objectives	✓				
Functionality and working performance of the system	✓				
Reliability and stability of the system					
Efficiency (time, power, cost effectiveness)	✓				
Scalability and potential for real world deployment	✓				
Safety considerations and risk handling	✓				

Project Validation:

- ☒ The project has been successfully implemented as proposed.
- ☐ The project is partially implemented and requires improvements.
- ☐ The project implementation is not satisfactory.

Comments / Suggestions:

A system should be in place to detect fire and identify the type of combustible material being burned.
